# COPPER FIRE AND WATER FEATURES

The HPC Copper Bowl Series is available in the Fire Bowl (NOT SHOWN) or the Pool Side Fire & Water Bowl models. Both versions are fitted with a CSA Certified match lit (MLFPK) or remote electronic ignition (EI) fire pit insert and are available with both Liquid Propane or Natural Gas. These come in an oil rubbed look with either a hammered finish or a smooth finish, based on model.

The Pool Side Fire & Water Bowls utilize 1" FIP fitting for pool pump connection.

**SHIPPING:** Both bowl and fire pit insert ship from Ohio warehouse - crate on pallet.

**Fire-and-water models now available in 12V for poolside applications.**

# H2Onfire - SHOWN ON FRONT

HPC is proud to announce another first in the industry, the H2Onfire fire on water feature. This insert has been a longtime request of our dealers (and the consumer). A true electronic fire on water, turn-key appliance operating at a gas pressure less than 1/4 psi, allowing for residential installations. It is also the first "fire on water" system to be certified in North America to the Z21.97 standard by the CSA Group - passing the stringent wind, rain, and combustion test.

The fire ring is totally submerged underwater using our patent pending burner design and back flow prevention to protect the controls - giving an even and very appealing flame at only 65,000 Btu. This is NOT a match lit system- it is remote control with auto relight. Our ignition and flame sensing network is located in the center tower monitoring flame conditions at all times. **Ships in crate on pallet.**
