**Terminal Designations**

1. Loosen screws until all wires are free.
2. Pull any excess wire back into the wall box.
3. Pulling the wall box with removable panel,
4. Pushing the wire through the wall box.
5. Mounting the wires, insert them through
6. Applying Type B, Type C:

**Wireing**

- Insert fuses into circuit breaker.
- Check for overheating.
- Overload protection.
- Check for overheating.
- Overload protection.

**Product Application**

- Cooling type:
- Heating type:
- Ventilation type:
- 24 VAC cooling systems (T8222)
- 24 VAC heating systems (T8222)
- 24 VAC cooling systems (T8222)
- 24 VAC heating systems (T8222)
Temperature Setting

Note: Temperature scales vary by model.

Adjust to set desired indoor temperature.

System Switch (select models)
- Off: All systems are off.
- Heat: Controls the heating system.
- Cool: Controls the cooling system.
- Fan: Controls the fan.
- On: All systems are on.

Fan switch (select models)
- On: Cooling system is on.
- Off: Cooling system is off.
- Auto: Fan runs only when heating or cooling system is on.
- 24: Fan runs continuously.
- 48: Fan runs continuously.

Thermostat Mounting

Operation

Sel Heat anticipator (Model 8722K Only)
